EXPLANATORY NOTES

Cash Yield (%) - Effective As of the Report Date

Canadian dollar credit balances receive interest limited to the greater of Prime minus 2.75% or zero. The CAD prime rate is currently set at 6.70%
US dollar credit balances receive interest limited to the greater of Prime minus 4.00% or zero. The US prime rate is currently set at 8.00%

Credit Quality ("Quality")

An individual bond or bond mutual fund's credit quality is determined by private independent rating agencies such as Standard & Poor's, Moody's and Fitch. Their credit quality designations range from high ('AAA' to 'AA') to medium ('A' to 'BBB') to low ('BB', 'B', 'CCC', 'CC' to 'C'). Investors interested in the safety of their bond investments should stick to investment grade bonds ('AAA', 'AA', 'A', and 'BBB'), while other investors willing and able to accept a higher level of risk could consider lower credit-quality bonds. Source - Bloomberg

Derivatives

GIM Model Portfolios do not make direct use of derivatives. However, ETFs held within the managed portfolios may gain exposure to securities directly and/or through the use of derivatives.

Dividend Yield (Equity)

The annual dividend per share divided by the price per share, expressed as a percentage. Source - Bloomberg

Effective Maturity

For a portfolio of bonds, average effective maturity is the weighted average of the maturities of the underlying bonds. The measure is computed by weighing each bond's maturity by its market value with respect to the portfolio and the likelihood of any of the bonds being called. Source - Investopedia (Via Bloomberg)

Exchange Traded Fund (ETF)

ETFs are index-based investment products that allow you to buy or sell shares of entire portfolios of stock in a single security. ETFs are unique in that they combine the opportunities of indexing with the advantages of stock trading. Source - Bloomberg

Fixed Income (Fixed Income Sector Weightings)

An investment that provides a return in the form of fixed periodic payments and the eventual return of principal at maturity. Unlike a variable-income security, where payments change based on some underlying measure such as short-term interest rates, the payments of a fixed-income security are known in advance. Source - Bloomberg. (This pertains to Corporate Debt, Preferred Shares, Government Debt, Securitized Debt, Syndicated Loans, US Municipal Debt, to name a few).

Fixed Income Ratings

A ranking of a bond's quality, based on its value as a sound investment. Bonds are rated from a high of "AAA" (highly unlikely to default) through a low of "D" (companies already in default). The rating is based on such factors as the issuer's reputation, management, debts, and its record in paying interest. Source - Bloomberg

Funds

Represents ETFs that Bloomberg does not have sufficient look-through capabilities.

Funds from Operations

Represents net income after preferred dividends plus depreciation on real estate income-producing assets, gains or losses from party sales, non-recurring gains or charges (excluding impairment of real estate assets), and debt restructuring. Source - Bloomberg

Funds from Operations Payout Ratio (FFO Payout Ratio)

Common dividends paid out to shareholders as a proportion of funds from operations. Source - Bloomberg

FX Conversions

All figures are in Canadian Dollars unless otherwise noted. FX conversions are performed by Bloomberg.

Geographical Mix

Read as follows: Canada vs. World (left pie chart); World is further broken down by region in descending order (right pie chart); figures illustrated below the pie charts are read from left to right.

GIM Balanced Growth Portfolio (Class R)

GIM300 is typically reserved for clients with investable funds in excess of \$250,000. Additional risks in GIM300 include but are not limited to company specific risks due to direct security holdings as well as foreign exchange risk.

EXPLANATORY NOTES

Interest Rate Sensitivity

A measure of how much the price of a fixed-income asset will fluctuate as a result of changes in the interest rate environment. Securities that are more sensitive will have greater price fluctuations than those with less sensitivity. This type of sensitivity must be taken into account when selecting a bond or other fixed-income instrument that the investor may sell in the secondary market. Source - Bloomberg

Market Capitalization

The company's worth calculated by multiplying the shares outstanding by the price per share. For companies with multiple shares, the market cap is equal to the market capitalizations of all common stock classes. For indices, this equals the sum of the current market values of the securities used to compute the index. Source - Bloomberg

Model Portfolio

The model portfolios presented in our factsheets do not represent composite portfolios, pooled funds or mutual funds. Portfolios that follow the model portfolio are rebalanced at a minimum when the model portfolio is rebalanced.

Modified Duration

The percentage price change of a security for a given change in yield. The higher the duration of a security, the higher its risk. Source - Bloomberg

Par Value

The stated amount of a bond. If the bond sold above the stated amount, it would be selling at a premium. If it sold below that amount, it would be selling at a discount. Source - Bloomberg

Portfolio Yield

Calculated by taking the weighted average of the cash, bond, and equity yield (dividend yield).

Price to Book (P/B)

The ratio of a stock's price divided by the book value per share. For indices, the price-to book value ratio is the average of the index member's capitalization divided by their book value. Book value is the value per share if the index members were liquidated. Calculated as: $P/B \text{ Ratio} = \text{Stock Price} / (\text{Total Assets} - \text{Intangible Assets \& Liabilities})$ Source - Bloomberg

Price to Earnings (P/E)

The relationship between a security's earnings per share and its current price. Used to compare the attractiveness of bonds, money markets, and stocks. Calculated as: $\text{Market Value Per Share} / \text{Earnings Per Share}$ Source - Bloomberg

Price to FFO (P/FFO)

Price as of the latest period end date divided by trailing 12 month Funds From Operations per share. Source - Bloomberg

Prime Rate

The interest rate on loans that commercial banks quote as an indication of the rate being charged on loans to its best commercial customers. Source - Bloomberg

Qualified Investment

An investment in properties, including money, guaranteed investment certificates, government and corporate bonds, mutual funds, and securities listed on a designated stock exchange. The types of investments that qualify for TFSAs are generally similar to those that qualify for registered retirement savings plans.

EXPLANATORY NOTES

REIT (Real Estate Investment Trust)

A security that sells like a stock on the major exchanges and invests in real estate directly, either through properties or mortgages. REITs receive special tax considerations and typically offer investors high yields as well as a highly liquid method of investing in real estate. Among other things, REITs invest in shopping malls, office buildings, apartments, warehouses and hotels. Source - Bloomberg

Sourcing

Model portfolio holdings are loaded individually into Bloomberg. Thereafter, Bloomberg provides the specific security statistics which are shown in the individual model portfolio fact cards.

Top 10 Indirect Equity Holdings

All GIM Model Portfolios report indirect exposure to underlying securities except for GIM415, GIM600 and GIM900, where the top ten indirect equity holdings may include indirect and total blended – direct and indirect – exposure.

Total Debt to Total Assets

A metric used to measure a company's financial risk by determining how much of the company's assets have been financed by debt. Calculated by addition short-term and long-term debt and then dividing by the company's total assets. Source - Bloomberg

Total Debt to Total Capital

Measure of a company's financial leverage that presents its total debt as a percentage of total capital. Calculated as: Total Debt X100/Total Capital. Source - Bloomberg

Yield (Bond)

The annual rate of return based on the price. It is calculated as $\{(\text{stated coupon} * \text{par value}) / \text{price}\} * 100$. Source - Bloomberg
